

## Workers We Know

Dear Parents,

One of the goals of our school is to help children become more aware of the world at work by receiving early exposure to a variety of careers. You may be aware of the School-to-Careers, which has been developed to create a more effective relationship between the classroom and the workplace. To make a student's education more meaningful, students need to realize how what they are learning now in school will help them prepare for their future lives and careers.

To enhance the students' career awareness, we are planning several career related activities. We would like to invite parents and others in the business community to be guest speakers and share their careers with the students. We need representatives from all career fields. In the presentation, we would like included the kind of work done on a typical day, the training and skills necessary for the job, materials or tools used on the job, visual aids, or anything to add interest.

If you are able to help, or know someone who can, please complete the attached survey and return it to school. You will be contacted to schedule a presentation. Thank you very much for your willingness to help.

Sincerely,

Teacher A. Name
